Click on the image to join us on Discord! Massive Breakdown Weapons Stats SpreadsheetFor Archetype Time to Kill Comparison tool, in order to make it work you just need to download yourself a copy of the table and then this will allow you to change the displayed level of resilience that will show you given TIKs and shots to defeat for each archetype (and a lot of exoticism) compared to this particular resistance. Not only that, but I also included calculations for so many RoF and damage benefit changes (e.g. Kill Clip, Rampage, double receiver speed, accelerated coils, etc.). If you have any questions or concerns, please let me know! If you want to download only the tool, not the entire table, I got it separated by itself here: Archetype TIK Comparison ToolA pair of caveats as always: The damage numbers are always rounded. To do this, damage to the display is equal to or greater than the actual damage. For weapons like scouts and hand guns that do high damage on a bullet, this usually has little effect. However, for a weapon that fires a lot with low damage, it can mean that they take an extra shot or two to kill. Fortunately, the difference in TIK is usually not very great because low damage means high RoF. The listed HP sustainability values are my best scores, rounded to whole numbers. I got them by shooting the player at all levels of resistance with a sniper body shot and then HC shots to the head at various stages of the damage go away. I've included the results below for the sake of transparency. In all likelihood, they are close but not perfect, but they should hopefully give you an idea of what maximum level of resilience you need to escape to survive a certain weapon. In some cases (maybe more than some) you may be able to run a point or two less than he says and survive, but I'll have to work on the numbers more in the future to narrow them down. I'll be working on the Menagerie Breakdown and Crown of Sorrow raid arms on!
