The Patient Care Specialist Exam is an important step in your career. By taking this exam, you will be able to get certified and demonstrate your team of knowledge and skills that are most relevant to this work. With what is said, it is a difficult exam, so it is worth learning more about it and making sure that you are doing everything possible to prepare for the day of the test. Who has the right to take the patient care exam? Before you can pass the exam, you need to apply along with supporting documentation to demonstrate that you meet the following criteria: Have a high school diploma or equivalent, and; Successfully complete an accredited or state-recognized curriculum, OR; To have at least one year of experience in the field you are looking for certification in. This work experience has been going on in the last 3 years. If you haven't met all of these criteria, but you expect within the next 12 months, you can still apply. However, if you do not meet all the criteria within the specified time frame, your certification will be suspended even if you have already passed the test. What will be the day of the trials? AThe exam is conducted via computer at most testing centers. However, paper and pencil tests are available at some authorized centers, so if you prefer that option, call in advance to make these arrangements. Either way, on the day of testing, make sure you arrive 30 minutes early to check in. Bring a valid (meaning not expired) the government issued id. If your current address is different from the address in the ID that you bring to the testing center, be sure to bring proof of address as well. A current utility bill or other mailbox with your name and address will work for this purpose. Once in the exam room, you will have 2 hours to complete a total of 120 questions. This includes 100 scoring questions and 20 unholy questions. What will I be tested on? AThe questions are regularly updated and based on work analysis to make sure that the exam tests you for the knowledge and skills that are most relevant to your career as a patient care specialist. Here's a quick overview of the types of things you'll need to know: Patient Care - 45 Issues, Safety and Professional Responsibility - 20 IssuesInficibility Control - 11 IssuesFlebotomy - 14 Questions - 10 Issues As mentioned, there will also be 20 unspoiled questions spread across these 4 categories. Since they are not defined, you just need to consider all the issues as scoring issues. This means that you have to factor this into your time management strategy during the exam. When can I find out if I've given up? AYour's final account is calculated on the site, so you'll find out right away whether you've passed or failed. However, official results The certificate will be mailed to you within the next 7 to 10 days. If you want your points sent elsewhere, you can do so at the time of registration. If you haven't passed the exam, you can schedule the next try while you're in the testing center, but the next meeting should be at least 30 days after the first attempt date. How long do I have to study for this exam? In addition to how comfortable you are with the material, you want to spend 3 to 8 weeks preparing for this exam. If you're unsure of your current knowledge or know you're struggling with the test, be sure to give yourself the extra time you need to study, build trust, and work on testing strategies. Even if you want to get it off, it's best to take extra time now before your first attempt than rush into it, fail the test and have to go through the whole process over and over again. A great place to start with Mometrix's Guide to Study and Mometrix Flashcards. These tools were developed by experts in accordance with the exact specifications of this test. You get easy to follow, chapter after chapter breakdown of all the necessary information. You will then be able to apply this knowledge to the practice questions provided and quiz yourself (or better by having a friend quiz you) with a flash card. Also, if you are struggling with the test, the guide comes with a proven testing strategy to help you deal with these complex issues and keep stress at bay. In order to be eligible for the Patient Care/Assistant Exam, you must have a high school/GED degree, and within the last five years you must successfully complete the patient care program. If you have not completed the curriculum, you must have at least 1 year of supervised work experience in the last 3 years. Patient Care Technician Research GuidePatient Care Technician FlashcardsThe exam will consist of 100 scoring points and 10 preliminary test points. You will be allowed 1 hour and 50 minutes to complete it. For subjects with conditions covered by the Americans with Disabilities Act (ADA), you can request special accommodation for testing. Check Out Mometrix's Patient Care Technician Research Guide to Patient Care: 48 questionsSafety: 10 issuesProfessional duties: 5 issuesInfixia Control: 4 issuesFlybotomy: 23 questionsEKG Monitoring: 10 issues Category patient care will address the topics of general patient care and patient care and phlebotomy and ecg training.
